## To the Voter

---

### The League of Women Voters

The League of Women Voters of Indiana is a nonpartisan public policy educational organization which:

- builds citizen participation in the democratic process

We influence public policy through education and advocacy. We never support or oppose any political party or candidate.

### Purpose of This Report

Most election data analysis focuses on the partisan political nature of our elections. As a non-partisan political organization, the League of Women Voters of Indiana focuses broadly on a citizen's right to vote and to vote in an informed manner irrespective of the specific candidate or party. Our democracy demands that its citizens show up to vote and that they can trust in the security and accurate tabulation of their vote.

This report focuses on how Indiana counties conduct elections and how voters choose to vote not who they vote for. The source data for this report are available in spreadsheet format to anyone to perform their own analysis.

### Using this Report

We believe this report and the source data are valuable to a variety of stakeholders in the state of Indiana. The League uses the data to evaluate its own voter education efforts and get out the vote activities. Other uses that we anticipate:

- Each county can use the data to benchmark their performance with any other county.
- Members of the Indiana General Assembly can use the data when drafting legislation.
- County councils and commissioners can evaluate the range of costs experienced in conducting elections.
- Election best practices should emerge as more data are gathered and published from future elections.
- Political parties and candidates can gain insights into voting behavior to refine get-out-the-vote and voter communications strategies.

- Researchers can use this report as one more piece of information to better understand the electorate and voting behavior.

## **Data Gathering Method**

Data for this report were gathered from two primary sources. The Indiana Election Division provided copies of the CEB-9 reports filed by each county. The League of Women Voters also contacted county clerks and requested public election data. In some cases, we also gathered election information from individual county websites.

Data gathering began in January 2021 and concluded in May 2021.

## **Correcting Data in the Report**

Every effort has been made to assure that the information gathered from the counties is correctly entered into the tabulating spreadsheet. If you have questions or corrections for any of the data in this report, please contact the following:

Chair Voter Services Coordinating Committee  
voterservicelwvin@gmail.com

## Turnout and Voting Patterns

|                    |           |                   |
|--------------------|-----------|-------------------|
| Registered Voters: | 4,751,370 |                   |
| Voters:            | 3,068,435 | Turnout Rate: 65% |
| Non-Voters:        | 1,682,935 | Sit out Rate: 35% |

| Method of Voting                    | Ballots Cast | Percent of Total Vote |
|-------------------------------------|--------------|-----------------------|
| Voted In-Person on election day     | 1,201,152    | 39%                   |
| Voted In-Person before election day | 1,384,136    | 45%                   |
| Voted by mail                       | 483,100      | 16%                   |

| Straight Party Voting           | Ballots Cast | Percent of Total Vote |
|---------------------------------|--------------|-----------------------|
| Straight party Democratic Vote  | 543,221      | 18%                   |
| Straight party Libertarian Vote | 7,504        | .2%                   |
| Straight party Republican Vote  | 823,070      | 27%                   |
| Total Straight Party Votes Cast | 1,373,795    | 45%                   |

## Mail In Absentee Voting

|   |        |
|---|--------|
| Absentee ballot applications formally challenged          | 61     |
| Number of mail-in ballots arriving too late to be counted | 12,149 |
| Number of mail-in ballots rejected for other reasons      | 1,200  |

## Election Cost

|                                     |              |
|-------------------------------------|--------------|
| Total Spent by Counties on Election | \$14,415,057 |
| Average per ballot cast             | \$4.70       |
| Average per registered voter        | \$3.03       |

If all Hoosiers voted at the same rate as in the top 10 counties, turnout would increase by 9% with an additional 447,579 votes

# County Data

## County Voter Turnout Performance Comparisons

Statewide average voter turnout was 65%. The top 10 turnout counties in Indiana had an average turnout of 74%. (365,002 voters voted out of 490,371 registered). If all Indiana counties voted at this rate, an additional 447,579 votes would be cast. That would be like adding another Allen, Hamilton, or Lake County to the election results.

The top 10 counties in Indiana for voter turnout:

| County     | Turn out Rate | Non-Voting Rate | Election Day Turnout | In-Person Early Voting Turnout | Mail-in Voting Turnout | Straight Party Voting Rate | Mail in Absentee Ballots Received Late and Not Counted | Mail in Absentee Ballots Received Before Deadline but Rejected | Election Cost |
|------------|---------------|-----------------|----------------------|--------------------------------|------------------------|----------------------------|--|--|---------------|
| Adams      | 73%           | 27%             | 36%                  | 55%                            | 9%                     | 20.5%                      | 153  | NA   | \$15,000      |
| Boone      | 72%           | 28%             | 16%                  | 64%                            | 20%                    | 39.0%                      | 25   | 0  | \$65,000      |
| Greene     | 74%           | 26%             | 46%                  | 40%                            | 14%                    | 38.4%                      | 14   | 31   | \$45,060      |
| Hamilton   | 75%           | 25%             | 27%                  | 50%                            | 23%                    | 37.5%                      | 96   | 277  | \$400,000     |
| Hancock    | 74%           | 26%             | 18%                  | 67%                            | 15%                    | 41.7%                      | 328  | 15   | \$65,000      |
| Posey      | 73%           | 27%             | 40%                  | 49%                            | 12%                    | 53.2%                      | 0  | 0  | \$81,600      |
| Vermillion | 73%           | 27%             | 55%                  | 32%                            | 13%                    | 29.0%                      | 2  | 0  | \$55,000      |
| Warren     | 72%           | 28%             | 55%                  | 37%                            | 8%                     | 47.8%                      | 2  | 0  | \$36,000      |

## Mail In Absentee Voting

Indiana law in effect for this election did not allow counting ballots that arrived after noon on election day. We are unable to report the total number of absentee ballots for all counties that arrived too late to be counted. In some cases, counties did not keep a count of the absentee ballots that arrived after the deadline since it was not deemed important or necessary to track.

However, based on the counties that did keep track of the number of arriving absentee ballots that arrived after the deadline, we can say that Indiana’s over-all voter turnout was decreased by 12,149 votes or .26% of the overall statewide vote. While the number may seem insignificant, this number of votes not counted is greater than the vote totals in 38 Indiana counties.

The following tables identify all counties that tracked mail-in ballot arrival times after the cut-off deadline and did not count late arriving mail-in ballots.

Top 10 counties reporting uncounted late arriving mail-in ballots. These counties account for 93% of the mail-in ballots that were not counted under prevailing state law.

| <b>County</b> | <b>Ballots Not Counted Due to Late Arrival</b> | <b>Percent of Total Late Arrival Uncounted Ballots</b> |
|---------------|--|--|
| Adams         | 153  | 1.34%  |
| Allen         | 183  | 1.61%  |
| Carroll       | 76   | 0.67%  |
| Gibson        | 90   | 0.79%  |
| Hamilton      | 96   | 0.84%  |
| Huntington    | 101  | 0.89%  |
| Marion        | 9441   | 82.98%   |
| Monroe        | 698  | 6.13%  |
| Warrick       | 463  | 4.07%  |
| White         | 77   | 0.68%  |

Due to the Covid-19 pandemic, there was increased voter interest in casting ballots by mail. The Indiana Election Commission allowed no-excuse absentee mail-in voting for the 2020 primary but did not extend this exception to the general election. Since some voters saw this policy as an attempt to suppress the mail-in vote, we gathered data on the number of formal challenges that local election boards initiated against a voter’s request for an absentee mail-in ballot.

Overall, we found that very few formal challenges were made to voters who requested absentee ballots. In total, there were 61 challenges issued which is .001% of registered voters.

#### Formal Challenges to Absentee Voting Applications

Number of challenges filed through form ABS-20 against an absentee voting application:

| County     | ABS-20 Forms Filed |
|------------|--------------------|
| Brown      | 5                  |
| Clark      | 9                  |
| Jennings   | 12                 |
| Monroe     | 21                 |
| Porter     | 1                  |
| Posey      | 1                  |
| Spencer    | 2                  |
| St. Joseph | 8                  |
| Wabash     | 2                  |

We visited Monroe County to inspect records and discuss their relatively large number of ABS-20 challenges. In every instance, the absentee voting application was challenged due to signature mismatch. Monroe county seemed to make every effort to work with the voters to resolve signature questions. We asked St. Joseph County to explain their number of challenges and received the explanation that voters indicated Covid-19 was their reason for requesting an absentee ballot. This was not one of Indiana's required excuses for requesting an absentee ballot and therefore the application was challenged.

# Observations and Recommendations

---

## Observations

1. Nearly 1.6 million voters did not go to the polls in a contentious presidential election year. Indiana's overall voter turnout continues to be the lowest among all our bordering Midwest neighbors according to data reported by The United States Elections Project ([www.electproject.org/2020g](http://www.electproject.org/2020g))
2. Hoosiers across the state vote early. 61% of the vote is cast before election day.
3. Straight party voting is a widespread, common practice among Hoosier voters.
4. There is a discrepancy in the way the straight party votes are reported among the various counties. Some counties indicated that ballots would be reported as a straight-party ballot even when the voter chose a candidate in another party. Some counties treat any vote switching as no longer a straight-party vote.
5. Counties on average spend around \$3.50 per registered voter to conduct their elections.
  - The assessment of election cost seems to be inexact and is probably an estimate in many cases. It's not clear that there is any shared understanding of what constitutes an election cost. We think an accurate cost-analysis could be useful for spotting election innovations or deviations from best practices in other counties.
  - We attempted to collect information on the cost of mail-in absentee voting but are unable to report this information since we do not have confidence in the accuracy of the information we received.
6. Some counties did not track and could not report how many mail-in absentee ballots were received after the deadline since they did not keep count of late arriving mail-in ballots.
7. All votes cast before election day are considered absentee votes, whether cast as a mail-in ballot or in-person ballot. Not all counties track or can breakdown the number of mail-in ballots that were received and the number of in-person early votes.
8. There is little evidence that election officials were formally discouraging mail-in absentee voting by formally challenging absentee ballot applications. We followed

up on ABS-20 forms issued in Monroe and St. Joseph counties. The challenges made seem to be justified under Indiana law.

9. While we did not find problems in the absentee voting application process through formal voter challenges documented in form ABS-20, we have heard anecdotally that less formal challenges may be made via phone calls to voters.
10. There is no clear relationship between what a county spends on an election and overall turnout.
11. We tried to gather data on the number of polling sites and voting machines deployed in each county for both early and election day voting. Those numbers are reported in the county detailed data but not reflected in the summary analysis. Our data collection efforts were not uniform and our terminology not precise enough to create a base of data that we felt could be used for analysis.
12. We did not gather data on the number of in-person voters who were unable to cast their ballot. Presumably we could gain insight to these numbers by analyzing provisional ballots cast.

## Recommendations

1. Clerks should track and report out separately the number of:
  - a. In-person early votes cast
  - b. Mail-in absentee ballot applications received
  - c. Mail-in absentee ballot applications rejected and why
  - d. Mail-in absentee ballots received after the deadline and not counted.
  - e. Mail-in absentee ballots received but rejected for other reasons and why
2. The state should set clear standards for counting straight-party votes and reporting straight-party voting data.
3. The state should provide written guidance for computing election cost data so that county to county the cost of elections can be accurately compared. One way that innovation and best practices will surface is through financial analysis of elections. We do not believe a meaningful financial analysis among the counties is possible today.
4. Clerks and Election Boards should review their early-voting operations to determine how their county's early in-person voting plan is addressing the needs of their voters who overwhelmingly prefer to cast their votes before election day. It is important that each county establish an adequate number of early voting sites based on population, site locations near transportation and in population areas, voting hours responsive to working Hoosiers, and enough voting machines to avoid long wait-times.
5. Our data gathering request should be refined to include information about provisional ballots including the number of provisionals declined by the voter and why.

## Recommendations Specific to the League of Women Voters

6. Voter education and get-out-the-vote efforts should be highly focused on the five-week period prior to an election.
  - Vote411.org (the League's on-line voter guide) should be launched with candidate profiles when mail-in absentee voting commences approximately five weeks before election day.

- Candidate interviews / debates should be organized and complete between three and five weeks before the election.
7. Mail-in absentee voting is new to many voters. Expanded voter education should be developed and delivered by local Leagues to better prepare voters who have a need to vote by mail.
  8. The League should develop a statewide campaign, in the months leading up to the deadline to register before each election, to encourage voters to check their registration either online or by contacting their Election Board.

## County Specific Data - Overview

---

County data was compiled from two primary sources. We received a copy of the CEB-9 forms submitted by each county to the Indiana Election Division. We also sent information queries to each county asking for about 15 different pieces of information. In some instances information from the CEB-9 form did not match information provided through our public records request. We tended to favor the information provided directly by the county.

Not all counties were able to provide requested information. In those cases, we have listed the data as NA or Not Available. Some counties also did not breakout their absentee voting between in-person and mail-in absentee voting. If there was no breakdown, we attributed all of the absentee voting to in-person absentee. We also did not consistently query counties about their number of voting sites or voting machines deployed. Therefore much of the data carries the NA label.
